

My name is Vinelli Rumbaua and I am writing to share my concerns for the possibility of The Law Courts Inn closure.

When hearing about the potential news - I was and still am utterly shocked. The Law Courts Inn has been a place very close to my heart. I am an event planner - specifically for weddings and have worked with a great deal of venues. I can honestly say there are no venues that can compare to The Law Courts Inn - especially when it comes to the architectural beauty, the views, the food, the history, the location and the staff. The concept of this venue turning into office space is quite alarming - given that the work from home flow is something that has been adapted and more companies are looking to stay this route.

The Law Courts Inn has so much more potential to increase their revenue whether or not Covid-19 requires a smaller amount of guests. This year alone I have booked 4 weddings at this venue which 3 have been postponed and 1 is still staying for 2020. This week alone I've already had 10 inquiries for booking weddings for 2021 and The Law Courts Inn is my number 1 place I refer. Weddings are a huge asset to have and The Law Courts Inn is an absolutely beautiful space that hits all the marks when I'm speaking to clients. 3 clients already want to come see the space in person because as soon as possible photos don't do it justice. I can confidently say, **there is no other place like The Law Courts Inn.**

I ask for your **reconsideration** on this decision as I don't believe it was fully thought out and can assure you that the revenue stream for weddings and The Law Courts Inn will only increase from here.

I would be happy to discuss on the phone, video chat or even in person to show and compare other venues and why The Law Courts Inn is so unique. Furthermore, I can put together business and marketing plans to show the growth and present the potential revenue that weddings alone can bring to this establishment.

Thank you for your time,
